<p>Product Description</p>	<p>Poly Magic is a super-quick high-gloss polymer finishing spray for use on exterior surfaces, that provides a lasting shine to exterior paint, plastic and chrome. Enhances rubber side molding and trim without blushing or whitening. Nonabrasive. Easy to use; just apply to exterior surfaces, wipe on then wipe off. Use after every wash to maintain a showroom finish.</p>								
<p>Directions</p>	<ul style="list-style-type: none"> • Shake well. • Lightly mist product onto the surface. • Immediately wipe product into the exterior surfaces using soft towel. • Allow polymer product to come to a slight haze. • Wipe or buff to a high-gloss with a second towel that is clean, soft and DRY to remove any excess product. • For optimal performance, use on a vehicle that has been properly cleaned and dried. This product can be used on a slightly damp surface as well. <p><i>NOTE: The haze will be slight as this product is a polymer, not a traditional carnauba wax. To avoid streaking, it is best to remove product once hazed. Use only a small amount of product, or enough to spread over applied area. Do not use on a HOT SURFACE.</i></p>								
<p>Surface Applications</p>	<p>For express, deep, high-gloss, and added surface protection of clearcoat, single stage, acrylic, lacquers, enamels, as well as powder-coated paints. Also, performs well on exterior chrome plastic and rubber.</p>								
<p>Additional Uses</p>	<p>Excellent on RVs, boats, motorcycles, bikes, and other painted and clearcoat surfaces.</p>								
<p>Helpful Tips</p>	<p>To ensure the highest performance of #63-QT Poly Magic it is best to remove all surface contamination with Clay Magic® #2200 fine detailing clay prior to application. Do not apply 63-QT in thick layers. Do not apply to hot surfaces. Product can be used in the sunlight if the surface is not hot.</p>
